

CARD 30 OVERLAPPING NOISE SYNTHETIC DATASET DASHBOARD

Overlapping Noise Source Analysis • Generated: November 07, 2025 • Source: Card 30 Overlapping Noise Generator

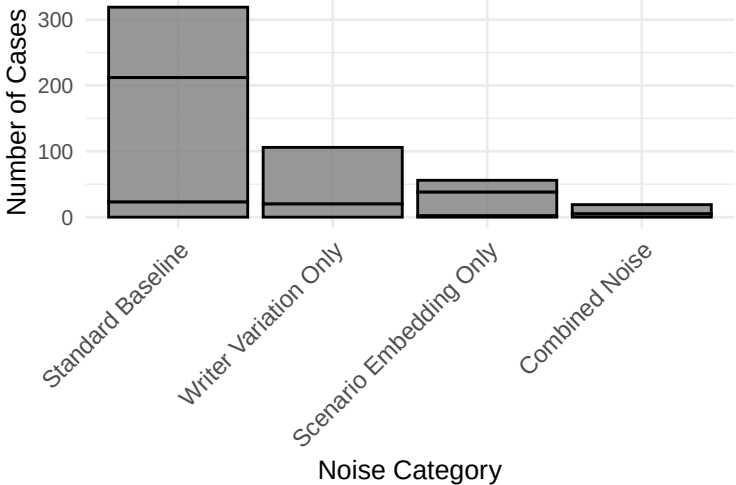

Card 30 Overlapping Noise Sources

Total Cases: 500 • Overlapping writer styles and scenario embeddings

Case Complexity by Noise Category

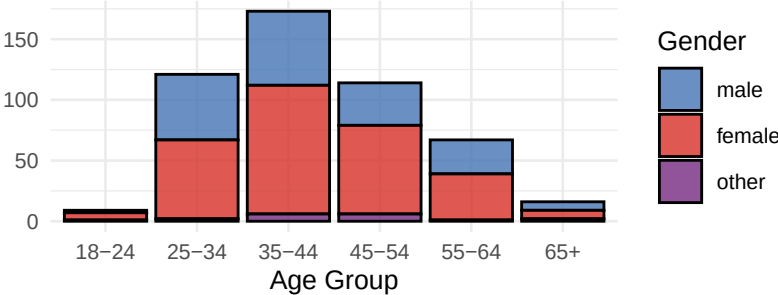

Distribution consistency across overlapping noise sources

Population Demographics

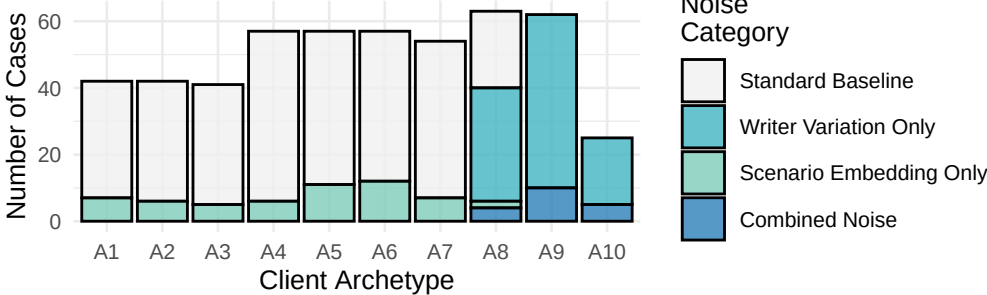

Average Age: 42.5 years • male (37.4%), female (59%), other (3.6%)

Number of Cases

Client Archetype Distribution

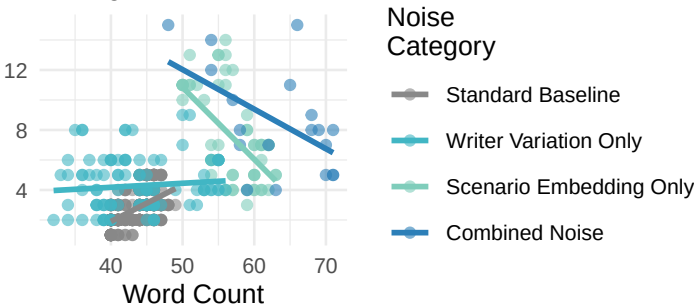

A1-A10 archetypes across overlapping noise categories

Case Note Complexity Analysis

Average Word Count: 46 words

Service Complexity Score

Overlapping Noise Features

Writer variations and embedded scenarios (can overlap)
